

Q2- 2021

Become Resilient

The world realized that COVID-19 is not going to disappear soon. Business leaders shifted focus to assess and review the strength of their organizational resilience.

Organizations built on the foundation of agility appear to be far more resilient – they can quickly modify their operating models without much of a fuss.

Resilience at ProductDossier have started to bear fruits and Q2 – 2021 is a harbinger of that!

Digitalization. The foundation of Resilience.

The FTI Consulting Resilience Barometer 2020 shows that in the face of emerging threats, most companies across the G20 remain unprepared. This lack of resilience detracts from their ability to take advantage of opportunities and invest for future growth.

Country	Score	Change to G20 average
INDIA	60	17
BRAZIL	58	15
INDONESIA	54	11
CHINA	51	8
MEXICO	47	4
CANADA	47	4
SOUTH AFRICA	46	3
TURKEY	45	3
ITALY	44	1
US	43	<1

Leaders focusing on higher organizational resilience must make the enterprise agile. Enterprise agility must be built on strong foundation of digitalization – at the speed of 5G or more! ProductDossier is glad to have treaded the path of digitalization when it was still a ‘fashion’!

The Action at ProductDossier

Data Privacy. GDPR Compliance.

For long, we believed data privacy to be the foundation of modern businesses, and had put in place systems, protocols, and controls to manage data privacy.

GDPR is a regulation applicable to the European Union (EU) requiring businesses to protect the personal data and privacy of EU citizens for processing of their personal data. We have completely aligned with GDPR norms including data privacy policy, roles & responsibilities for data protection, organizational awareness, processes & controls, and regular assessments.

ProductDossier and data privacy go together.

Information Security. SOC Compliance.

As a leading software services provider whose software handles transactions worth billions of dollars, ProductDossier considers “System and Organizational Controls (SOC)” as the foundation of dependable financial information and data security.

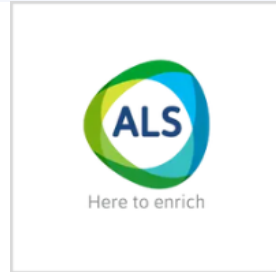

Dealing with customers like you, we strongly focus on –

- Internal financial controls, and
- Compliance to security, availability, processing integrity, confidentiality, and privacy.

The SOC1 and SOC2 Certifications are a testimony to our laser-sharp emphasis on financial controls and data security.

Trust ProductDossier with the security of your data.
