Resources

The driver of value and cost!

Organizations are undertaking programs and projects at an unprecedented rate to ensure execution meets strategy.

The focus on program and project management has put tremendous pressure to plan and manage a company's most important asset – resources!

The complexity increases when resources are deployed to multiple engagements at the same time and working from different geographical locations and time zones.

Project Resources
Key Challenges

1. No visibility into resource demand and availability.

2. Unable to thoroughly analyze resource skills and competencies.

3. Ad hoc and inaccurate and resource estimation.

4. Inefficient Spreadsheets/emails approach to manage resources.

5. Poor resource allocation, productivity, and utilization.

6. Ineffective resource tracking.

7. Data inconsistency due to disparate ERP, HRMS, and other systems.

Project Resources
Lost opportunities

Misaligned projects vs. resources prioritization.

Significantly high cost of resource management.

Reduced project profitability.

Missed billing due to ad hoc resource tracking.

Ineffective resource management drives higher attrition.
